SITUATION SUMMARY

7.8 Magnitude Earthquake, Kathmandu, Nepal

Per Cal OES Fire Branch on **04/28/15 at 1844 hours:**

Update from FEMA HQ US&R Program Office

In response to Nepal's request for urban search and rescue (US&R) assistance the United States State Department, U.S. Agency for International Development's, Office of Foreign Disaster Assistance (USAID/OFDA) has deployed two INSARAG-Classified Medium US&R teams: Fairfax County, VA (VA-TF1, identified by USAID/OFDA as USA-1), consisting of 54 personnel to include six Canine Search Teams; and Los Angeles County, CA (CA-TF2, identified by USAID/OFDA as USA-2), consisting of 57 personnel to include six Canine Search Teams.

- USA-1 **has arrived in Nepal.**
- USA-2 **has arrived in Nepal.**

Situation

- At 2311 hours on 04/24/15 a 7.8M EQ occurred in Nepal, approximately 40 miles away from the capital of Kathmandu. The EQ was also felt in Pakistan, India, Tibet, Bangladesh, and China. The earthquake and its aftershocks have resulted in a significant number of fatalities and injuries, with widespread damage to buildings and infrastructure. **As of 1630 EDT 04/28/15, the Government of Nepal is reporting 4,682 (+867) fatalities and 9,240 (+2,194) injuries.**

Weather of Concern

- No significant Weather Watches or Warnings are in effect.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A weak front moving over the west coast has brought some high clouds and cooler temperatures across the area. A few sprinkles are still possible. Dry conditions will persist the rest of this week. Interior temperatures will trend upward beginning Wednesday as high pressure dominates the weather pattern through the weekend.

Medford Weather:

A cold front moved east of the area overnight. It has left lingering low level and mid-level moisture with areas of mostly cloudy skies including patchy fog. This cloud cover will dissipate during this morning while a few high clouds arrive from the west. These high clouds will be thickest during the afternoon and evening hours and are associated with a weak shortwave. The main results of this very weak disturbance will be high temperatures several to as much as a dozen degrees cooler than on Tuesday, breezy northwesterly afternoon and evening winds that will be a few mph weaker than on Tuesday, and also weak instability with a slight chance of showers and thunderstorms in the late afternoon and early evening near and over the warmer mountains of southeastern Lake and eastern Modoc counties.

Reno Weather:

Temperatures will remain well above normal this week. Some breezy winds are expected today as weak low pressure passes by to the north. A weak trough will then develop near the west coast for the end of the week and bring a slight chance for showers and thunderstorms each day through the weekend, with increasing thunderstorm chances into next week.

San Francisco Weather:

Cool marine air is expected to impact much of the area through early Wednesday then drier and warmer offshore flow will develop Wednesday night and Thursday. Temperatures should peak Friday then cooler onshore flow is forecast to return over the weekend into early next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

High pressure will bring mainly dry weather and above normal temperatures to the area through early next week except for a chance of thunderstorms near the Sierra crest from Thursday on. Breezy north winds will be possible Thursday. A Pacific low will bring an increased threat of mountain showers or thunderstorms the middle of next week.

Hanford Weather:

Dry weather and above normal afternoon temperatures can be expected over the central California interior through then end of the week. Isolated thunderstorms will be possible over the Sierra for the weekend.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Warm and dry conditions will continue through Friday as high pressure aloft lingers over the area. For the weekend and into early next week low pressure will develop to the southwest. This will result in a stronger sea breeze cooler temperatures and an extensive night and morning low cloud pattern.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

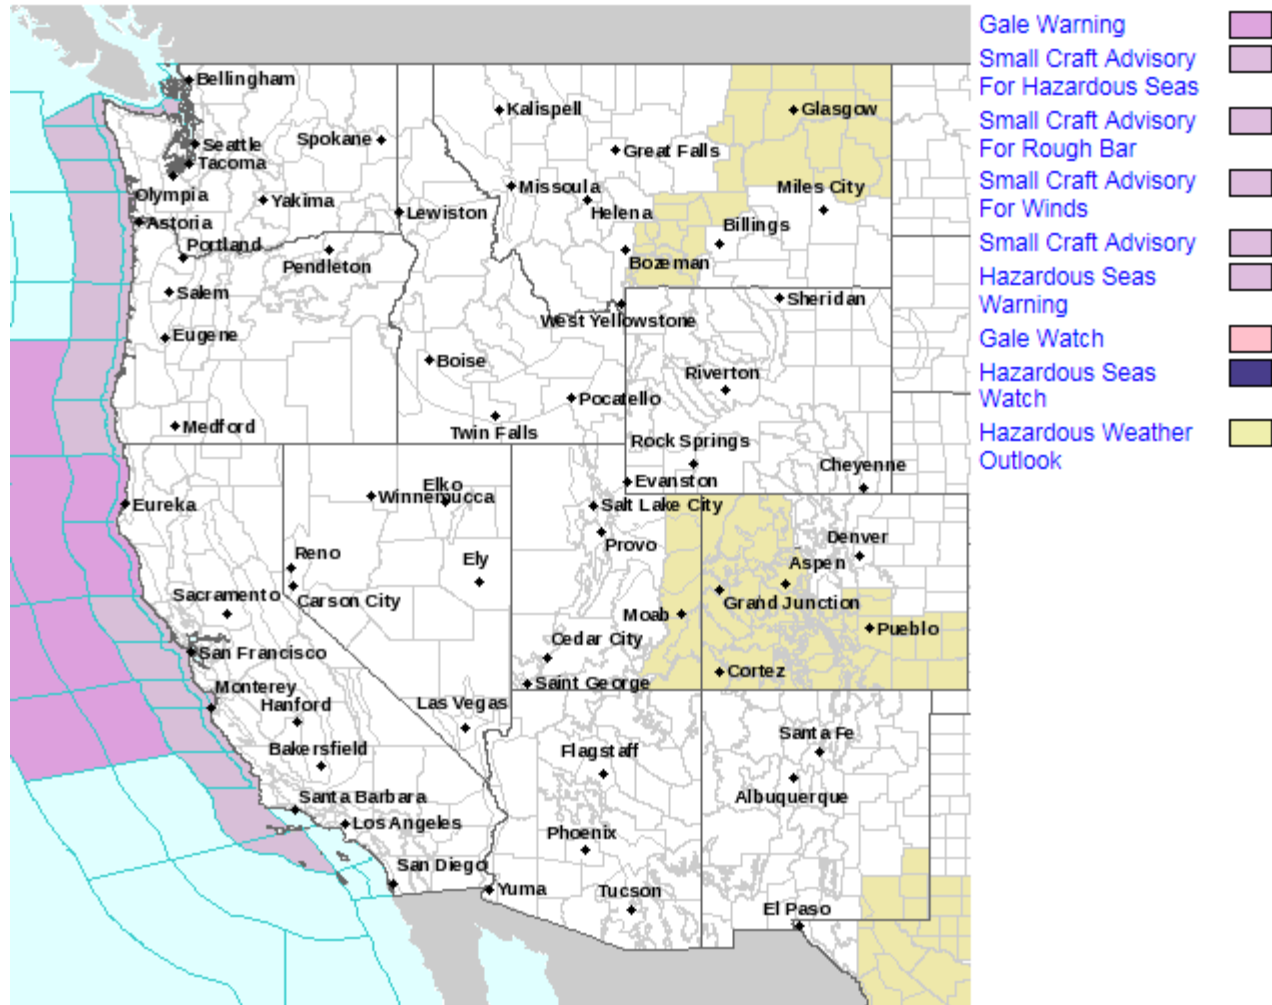

High pressure aloft over the southwest will keep the days sunny and very warm inland through Friday while a stronger sea breeze near the coast brings gradual cooling. The high pressure will break down this weekend and early next week allowing the cooler marine air to extend farther inland accompanied by higher humidity increasing coastal clouds and fog and cooler days.

Southeast California Weather:

The warming trend will continue the next several days reaching its peak Thursday and Friday. Most lower desert locations will hit triple digits for the first time this year which is right around when we would normally expect that to happen. Temperatures will then cool slightly through the weekend as a weak storm system moves in which may lead to a few showers for higher elevation areas early next week.

RECOVERY ACTIVITIES

Round Fire, Mono County

- Only two tree falling crews working. No air monitoring conducted.
- Two tree falling crews continued to remove, buck, and chip hazard trees on the private home sites. .

Project Totals as Day 27:

| | |
|-------|--|
| 37 | Homeowners who registered for the removal project. |
| 4 | Homeowners that denied entry. |
| 38 | Initial site assessment/site documentation complete. |
| 38 | Asbestos survey completed and results received. |
| 37 | Debris removal completed. |
| 37/31 | Confirmation sampling completed/approved. |
| 29 | Tree Removal Completed (35 homes have hazard trees). |
| 0 | Erosion Control Completed. |
| 0 | Approved by County for Building Permit. |

Estimated Daily Tonnage:

| Category | Day 27 |
|-------------------|---------------|
| Debris/Ash | 0 |
| Soil Disposed | 0 |
| Metal Recycled | 0 |
| Concrete Recycled | 0 |
| Total | 0 |

Estimated Project Total Tonnage for the Project as of Day 27:

| Category | Total Tons |
|-------------------------|-------------------|
| Debris and Ash Disposed | 3,459 |
| Soil Disposed | 4,480 |
| Metals Recycled | 1,476 |
| Concrete Recycled | 3,916 |
| Total All Categories | 13,331 |

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Regional (Inland, Coastal, Southern) conference calls continue to occur on a weekly basis.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:
